

# Blended Intensive Program (BIP)

Campus HALLEN, Slachthuislaan 70, BE-2000 Antwerpen

30 MARCH – 3 APRIL

Theme: VALIDATION

- Chemistry and Biomedical Laboratory Technology
- Accompanying lecturers from AP-university:  
Ine Opsteyn and Benny Peeters

## VIRTUAL MEETING

4, 11, 18 MARCH (6 pm - 8 pm)

What to expect

We will have our initial encounter through three Teams meetings. Through a virtual tour, we'll delve into your country, your city, your university offerings, suggesting the theme 'validation of an instrumental analysis technique in chemistry' and create a 'design of experiment' supported by statistical principles.

## PHYSICAL MEETING

30 MARCH - 3 APRIL

During five days you will validate a technique (spectroscopy or chromatography) in a group of students. Your goal is to verify that the protocol and the used instrument are capable of delivering the intended results with a high degree of certainty.

## DISCOVER BELGIUM

Perhaps you're hoping to visit Antwerp, and by extension, other cities in Belgium. Short city trips to Brussels and Bruges are easily planned from Antwerp. Belgium isn't that big, after all. Discover the gems of Belgium. The choice is yours.
