

Why Chose MACMoM?

Up to 6 Months of
guaranteed paid
Industry Internships

Hands-on Wet Lab
& Computational
Training

Close Mentorship
& Step-by-Step
Guidance

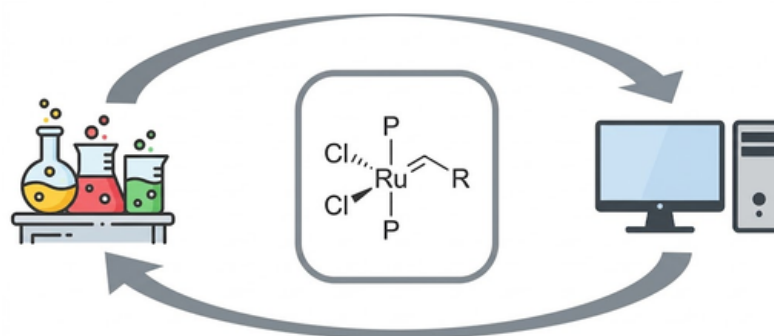

Direct Access to
PhD Programs &
R&D Jobs

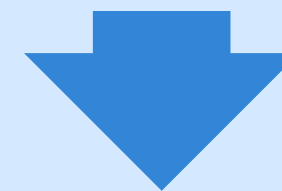

MACMoM

Master in Advanced
Catalysis and
Molecular Modeling

The Hybrid Profile Future
Science Demands: Master
Molecular Synthesis &
Simulation

Have Doubts? Hear Our Alumni!

“ I was afraid of getting left behind in computational chemistry classes, but thanks to the great support from the professors I easily overcame it.”

“ Studying in English every day was the key to losing my fear and mastering the professional communication I need today. ”

“ The organic synthesis knowledge I gained is essential for my daily work in process optimization and industrial scaling”

“ The long internship gives you real time to adapt to the industry, which directly opened the doors to my current R&D role. ”
